I would suggest Mike McDonald and Mark Bagley to start, then possibly include a few other folks in Cinti: Joe Flotemersch, Ken Fritz, Heather Golden, and Chuck Lane

Subject: Request from Gold King Mine area command

Hi Jennifer

Patti Tyler contacted Greg yesterday about identifying possible experts who could help the Region staff the development of a long-term watershed monitoring strategy for the Animas and San Juan Rivers. Patti is interested in identifying experts in surface water, drinking water, groundwater, and sediments. I think that there most likely will be a modeling component, so the work that Kate Sullivan's group is doing should be included.

It looks like this will be a low-level of effort. Probably a bunch of conference calls and maybe some writing as it pertains to the person's area of expertise. It's really not even in the formative stages yet, just exploratory. I have a similar request into NRMRL and NHEERL.

I don't have an overarching point of contact in NERL besides you, but if there is someone else on your staff I could work with on this that would be great. I know you've got a lot on your plate.

Greg and I are hoping to get the names to Patti this afternoon or tomorrow morning.

Thanks.

Eric
